

## Condensation curing silicones

Professional use in Dental laboratory

Professional use in Dental clinic extra cee countries

### MICRON LIGHT

- low viscosity
- blue colour

### MICRON REGULAR

- medium viscosity
- orange colour

#### Usage:

- for the two stage technique in conjunction with Micron Putty or Micron Confort

#### Characteristics:

- high elasticity and tear stenght
- high index of flowability
- no deformation
- mixing with catalyst both gel and liquid
